

Floor Mat Facts: Rent vs. Purchase

**When you're overpaying for floor mats...
It's twine time.**

Purchasing a matting system is a long-term, more cost-effective solution for your facility's everyday needs. The quality, performance, sustainability and cost to purchase vs. rent is the optimal choice for any facility.

PURCHASE VS. RENTAL Q&A

CUSTOM LOGO MATS

1. Choose the type of mat application you need for your facility.
2. Customize your mat selection and personalize it with your logo or design.
3. Contact your APT Account Support or your Sales Representative with questions.

Are rental mats cleaned more often than purchased mats?

The service intervals for mat rental ranges from weekly, monthly or bi-monthly. However, most facilities have a contractor or their own staff clean their mats on a daily basis.

What is the best option to establish a mat program for your facility?

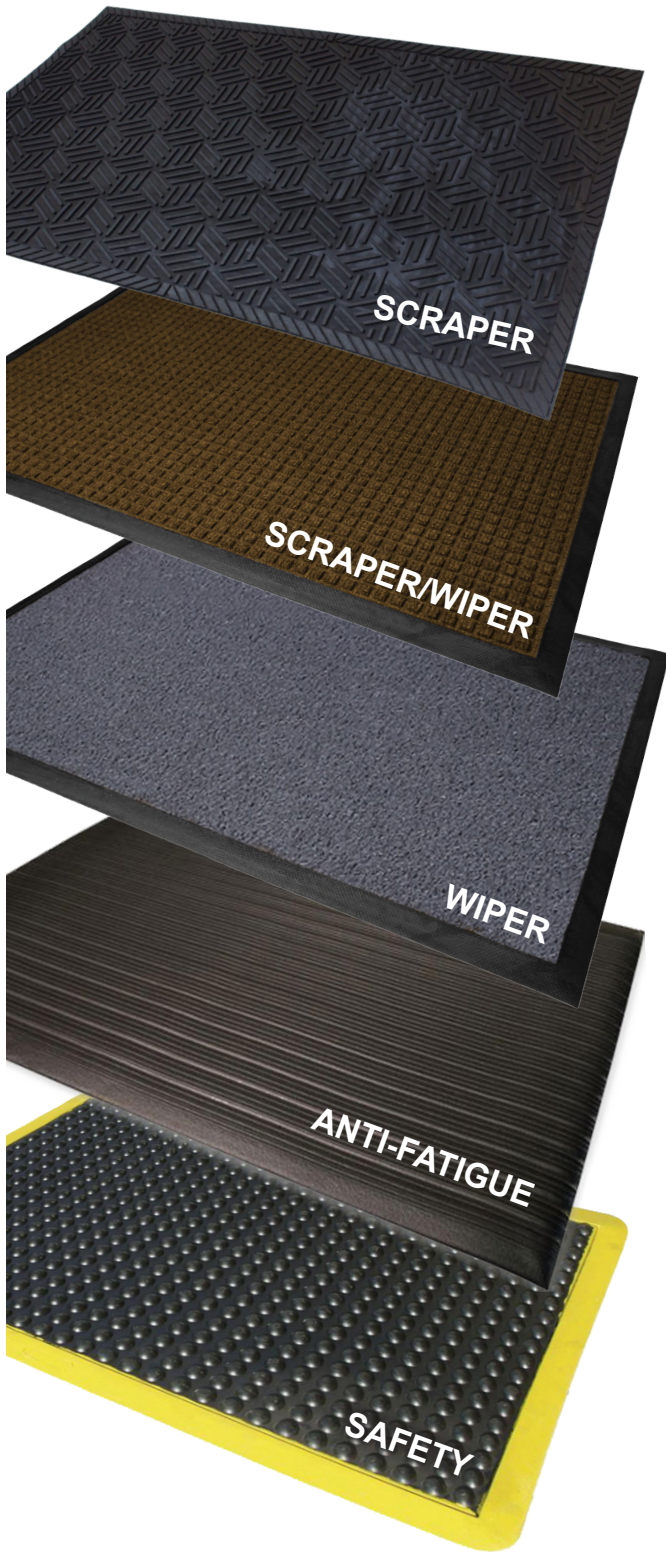

Purchasing mats is the best way to create an effective mat program. Rental mat programs offer small size mats that are not big enough to be effective, sometimes requiring multiple mats which causes safety issues. A truly effective mat program includes Scraper mats, Scraper/Wiper mats, Wiper mats, Anti-fatigue mats and Anti-slip mats.

What are the benefits of purchasing an effective mat system?

Substantial cost savings and improved safety with better performance and no Rental Program costs. Purchasing mats allow you to choose colors and coordinate mats that complement your interiors.

Do rental mats stop moisture and dirt?

The nylon face fiber on rental mats crushes flat, allowing dirt to track into the building. The construction of a rental mat, when saturated, allows water to flow off the mat and create a safety hazard. Purchased High Performance mats have a permanent bi-level face to eliminate crushing, create a "door filter", and provide years of performance life.

Scraper Mats

A commercial sized scraper mat is your first line of defense when protecting your floors and workplace. The typical scraper mat is made from a durable material that has a textured top surface that provides an aggressive scraping action. *To be the most effective, your scraper floor mats should be placed outside the entrance to your facility.*

Scraper/Wiper Mats

A scraper/wiper combo entry mat can help to eliminate most dirt, dust and soil from being tracked into your commercial building. Multi-directional brushing action of textured top surface removes dirt and moisture. Made from a durable material similar to entrance scraper mats. *Scraper/Wiper mats can be used inside or outside the entrance.*

Wiper Mats

Wiper mats can drastically improve the appearance and life of flooring. These mats have incredible dust retention properties that contribute to improving the air quality and cleanliness of your facility. The positively charged microfibers help keep hair, lint, dust and more from polluting the air. *Wiper matting should be placed in interior high-traffic areas. These mats hold liquid and filth that saves labor and cleaning time.*

Anti-Fatigue Mats

Anti-fatigue matting has been proven to actually change the chemistry of the lower body, reducing lactic acid buildup by keeping muscles active. This translates into less strain and pain, better employee morale and attendance, and lower workers' compensation claims. *Provide a healthy work place. It is reported that 83% of industrial workers suffer from foot, leg and back pain at one time or another.*

Safety Mats

Slips and falls are the #1 cause of injury in almost every setting. Slip-resistant surfaces, bright colors, beveled edges and static dissipation improve safety, saving you money and trouble. *Protect workers, guests and customers from risk with properly placed safety mats.*
